

SAUGAAT

The Art of Thoughtful Gifting

UX IMPLEMENTATION PLAN & SPECIFICATION REPORT

A comprehensive breakdown of the newly implemented luxury interactive features, distinct User/Admin Dashboards, and brand customizers in the Saugaat E-commerce platform.

PROJECT METADATA & LOGIN INSTRUCTIONS

Client Test Login (Customer):

Email: **customer@saugaat.com** | Password: **saugaat123**

Client Test Login (Administrator):

Email: **admin@saugaat.com** | Password: **saugaat123**

Note: These mock credentials bypass Supabase network checks for local testing efficiency.

Target Environment: Vercel Production Build

Date of Compilation: June 01, 2026

1. CUSTOMER DASHBOARD & CONCIERGE STUDIO

The Customer Dashboard has been redesigned to provide a visual, personalized user experience, featuring interactive tooling to custom craft and preview packages before purchasing.

A. Loyalty Tier Integration & Experience Point Meter

- Welcomes users with a customized Gold Tier Member badge and XP bar showing points needed for next tier.
- Dynamic stats grid displaying total orders, wishlist counts, and redeemable gifting coupons.

B. Feature 1: Build-Your-Own-Hamper Studio

- Fully interactive workshop allowing users to choose luxury box casings (Velvet Box, Gilded Casket, Linen Casing).
- Live packaging visualizer displays product thumbnails floating inside the selected box as they are added.
- Real-time budgeting card automatically calculates base casing price, individual items, and total hamper cost.
- Dynamic validation limits hamper selections to 5 items to guarantee premium casing safety.

C. Feature 2: Greeting Card Calligraphy Studio

- A custom greeting card workspace with a live 3D-styled preview card (with golden border and wax seal).
- Supports real-time text input rendering directly inside the greeting card in matching typography.
- Choice of premium calligraphy scripts (Royal Gold Script, Vedic Serif, and Minimalist Sans).
- Choice of luxury inks (Liquid Gold, Crimson Red, Royal Navy) with immediate card repaint.

D. Feature 3: Occasion Gift Registry & Funding Pools

- Enables users to schedule and publish gift pools for weddings, housewarmings, and festive occasions.
- Tracks event targets and contributions with a premium gradient-filled funding progress bar.
- Interactive "Create New Registry" drawer updates the active dashboard registry deck dynamically without page reload.

E. Express Order Status Timeline Tracker

- Frosted glassmorphic panel depicting order updates in a graphical timeline (Ordered -> Processing -> In Transit -> Delivered).
- Employs a pulsing golden indicator on the active shipment step alongside auto-scrolling log descriptions.

2. ADMIN CONSOLE & GLOBAL AI CHATBOT CONCIERGE

The Administration Portal offers granular overview dashboards, SVG charts, and interactive marketing controllers to manage active customer voucher campaigns.

A. Feature 4: Marketing Campaign & Discount Creator

- An admin-exclusive tool for adding discount coupon vouchers and configuring active audience targets.
- Real-time promo banner mockup generator outputs marketing banners dynamically as details are configured.
- Supports theme colors (Navy, Ruby, Gold) rendering the voucher code, discount seals, and target tiers.

B. KPI Metrics & SVG Sales Charts

- High-end analytical cards for Weekly Revenue, active listings, and reviews with custom inline sparklines.
- Custom weekly revenue line graph drawn using responsive SVG curves and interactive tooltips on hover.
- Inventory health section displaying real-time stock alert badges (Out of Stock, Low Stock) with restock action buttons.

C. Feature 5: Global Gifting Curator AI Chatbot Widget (Aditi)

- A global, floating assistant widget featuring glassmorphism layout and custom entrance animations.
- Preset click-queries simulating typical customer inquiries:
 - "Track Order #SG-89302" outputs an in-chat delivery tracking card with detailed local shipping logs.
 - "How to build custom hamper" advises on dashboard builder usage and links directly to the tool.
 - "Check active promotions" lists codes created in the Admin Dashboard (e.g. FESTIVE20).
 - "Speak with Gifting Curator" displays an interactive contact lead form directly inside the chat.
- Custom text submission replies with a luxury concierge responder to handle unmapped inquiries.

VERIFICATION & DEPLOYMENT INSTRUCTIONS

1. Run the local development server: `npm run dev`
2. Compile the production package: `npm run build`
3. Vercel deployment pipeline:

All changes pushed to

main

Vercel URL: <https://saugaat.vercel.app>
Branch will be automatically built and deployed via the GitHub integration.
